A modern responsive front-end framework based on Material Design

GET STARTED

Speeds up development

We did most of the heavy lifting for you to provide a default stylings that incorporate our custom components. Additionally, we refined animations and transitions to provide a smoother experience for developers.

User Experience Focused

By utilizing elements and principles of Material Design, we were able to create a framework that incorporates components and animations that provide more feedback to users. Additionally, a single underlying responsive system across all platforms allow for a more unified user experience.

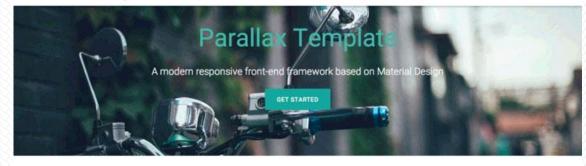

Easy to work with

We have provided detailed documentation as well as specific code examples to help new users get started. We are also always open to feedback and can answer any questions a user may have about Materialize.

Company Bio Settings Connect We are a team of college students working on this project like it's our full Link 1 Link 1 time job. Any amount would help support and continue development on this project and is greatly appreciated. Link 2 Link 3 Link 3
